Detailed Action

Claim Objections

Claims 3-5 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. What the compound binds to is of no patentable import to the compound as claimed, as this must be inherent based on the properties of the compound. The intended use of the compound is of no patentable import to the compound as claimed.

Claim 1 is objected to because of the following informalities: in the last line of the claim, "acetyte" has been misspelled. It is believed applicants intended "acetyl". Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 is drawn to an antiviral or antibacterial agent comprising the compound of claim 1, however, the claim fails to include any other ingredients which are to be used in the composition. Composition claims should contain more than one agent, i.e., a carrier, or diluent,

for example. Applicants should add an additional agent for which support is founded in the original disclosure.
